

McAbee
BUILD BETTER. BE BETTER.

FABRICATION

McAbee has a wide range of weld procedures, code stamps and qualifications for any fabrication needs.

www.mcabeeinc.com

McAbee is a major source for prefabricated process piping, tanks, autoclaves, vessels and sheet metal for industrial applications in the power, chemical, oil, automotive, aerospace, pulp & paper, refining, steel and food & beverage industries. McAbee has developed a cutting-edge, proactive quality program which enables a more efficient, higher quality end result.

Advantages to working with McAbee include:

- 144,000 ft.² of covered fabrication facility
- 80 acres of laydown area
- More than 130 ASME Section IX Welding Procedures
- Local Post Weld Heat Treating capabilities
- In-house drafting and multiple modeling software solutions
- Web-based customer access to real-time quality records and progress tracking data
